

ITR CANADA

Your Dedicated Partner in Drug Safety

ITR listed as the #1 Inhalation/Respiratory Toxicity CRO

Effective market research is essential when making expensive long-term business decisions, as is the case when deciding on a contract research organization to conduct your preclinical toxicity studies.

An independent analysis of the preclinical CRO market landscape from Contract Pharma ranked 44 CROs in terms of proprietary technology, certifications & accreditations, GLP compliance, expertise for IND filings etc. The final evaluation listed ITR Laboratories Canada Inc. as one of the top 5 overall best performing CROs in terms of both technical and commercial scores, as well as the highest performing inhalation/respiratory CRO.
